

CSS transition-duration Property

Example

Let the transition effect last for 5 seconds:

```
div {  
  transition-duration: 5s;  
}
```

Definition and Usage

The `transition-duration` property specifies how many seconds (s) or milliseconds (ms) a transition effect takes to complete.

Default value:	0s
Inherited:	no
Animatable:	no. Read about animatable
Version:	CSS3
JavaScript syntax:	<code>object.style.transitionDuration="1s"</code>

Browser Support

The numbers in the table specify the first browser version that fully supports the property.

Numbers followed by -webkit-, -moz- or -o- specify the first version that worked with a prefix.

--	--	--	--	--	--	--

Property					
transition-duration	26.0 4.0 -webkit-	10.0	16.0 4.0 -moz-	6.1 3.1 -webkit-	12.1 10.5 -o-

CSS Syntax

```
transition-duration: time|initial|inherit;
```

Property Values

Value	Description
<i>time</i>	Specifies how many seconds or milliseconds a transition effect takes to complete. Default value is 0s, meaning there will be no effect
initial	Sets this property to its default value. Read about <i>initial</i>
inherit	Inherits this property from its parent element. Read about <i>inherit</i>
